

Color InSight

APPLICATION REQUIREMENTS

Operating System:

Color InSight supports both Mac OS X and Windows platforms. The following versions are officially supported:

- OSX 10.7 Lion
- OSX 10.8 Mountain Lion
- **OSX 10.9 Mavericks**
- OSX 10.10 Yosemite (Planned support for release)
- **Windows XP** (Support will expire in future releases)
- **Windows 7**
- **Windows 8**
- **Windows 8.1**
- Windows Server 2008
- Windows Server 2012

*Items in **Bold** are the recommended operating systems.*

Recommended Hardware:

- Multi Core processor (Intel i5 or better processor recommended).
- 4 GB of RAM for desktop, 8 for server installations.
- Allocated space for database as needed. (SSD drive will improve performance substantially.) Application Installer requires ~100 MB of space.
- 1024x768 or higher resolution monitor.
- Server Database (Mac Only, PC coming soon) - Supports Postgres and CUBESql databases. Postgres.APP installer recommended (v9.3.2+ required)

Setup and Configuration:

Installation takes less than 5 minutes. Setup of a new server database and configuration will take approximately 10-15 minutes. Software requires a license key for activation. In most cases an administrative password is required for installation of the software. Internet access may be required to enable some features.
